Our Services

Custom Application Development

Synchronisys custom application development services can leverage the latest technologies in .NET, JAVA or Mobile (iOS and Android) to provide scalable software solutions that grow with your business' needs.

Technical Staffing Solutions

Synchronisys provides hourly IT consultants to augment our client's existing IT teams. The skill set is defined by the client's needs. We deliver diverse technology experience and expertise across the IT lifecycle.

Project Management & Business Analysis

Synchronisys provides comprehensive project lifecycle services, from Project Scoping, Requirements Analysis, Design Reviews, Application Integration, Project Management as well as Testing and Maintenance.

Software Testing & Validation

Synchronisys' testing services employ modern testing methodologies and tools that allow you to minimize the many risks associated with software bugs, incomplete functionality and inadequate application performance.

About Us

The founders of Synchronisys have a cumulative experience of over 3 decades in the IT industry, right from managing turnkey projects to delivering custom solutions. We also partner with some of the large consulting firms to provide contract resources to help deliver on their critical projects in a timely and cost effective manner. Our proven software development methodology includes a focus on key business drivers, an emphasis on analysis, and reusable design elements. Synchronisys domain knowledge, technical expertise and creative minds offer adaptive solutions that evolve with the changing requirements of global business.

Building Relations with our Clients & Consultants.

Client Testimonials

Duman Jumerov
Business Analyst

"It is a great company with friendly and experienced staffs. All the departments are really helpful. Being part of the company, I have gotten opportunities to enhance my knowledge, obtain new skills, and expand my range of IT interests. The company is not very big, but it has a huge dedication for work and employees' objectives. Recommend the company to all. Thanks!"
